**MI-TIC-E**

**INTRODUCTION**

The Mi-TIC E is the world’s smallest high resolution thermal imager for fire fighting applications. The camera provides a crystal clear image with dynamic range up to 760°C (1400°F) and at the same time see very low temperature objects, which is ideal for casualty searches. Every Mi-TIC E is supplied with a unique dual use desktop/in-truck charger station which securely retains and charges both the thermal imager and a spare battery. The charger stations can be daisy-chained together, up to a maximum of 6 units.

**PERSONAL**

Weighing approximately 750g (26oz) the Mi-TIC E is a small format thermal imager that can be easily and comfortably held in the palm of your hand. Unlike many thermal imagers, the Mi-TIC E design allows it to be worn in multiple ways – in the hand, inside a pocket, clipped outside a pocket, clipped to a lanyard or hung around the neck.

| MI-TIC-E-1 | $4,299.00 |

---

**MI-TIC 320**

The Mi-TIC 320 is part of the argus range of thermal imaging cameras and is the world’s smallest NFPA 1801 certified high resolution thermal imager for fire fighting applications. The camera provides a crystal clear image with a superb dynamic range: you can clearly view extremely high temperatures without whiteout, and at the same time still see very low temperature objects, which is ideal for casualty searches. Every Mi-TIC 320 is supplied with a unique dual use desktop/in-truck charger station which securely retains and charges both the thermal imager and a spare battery. The charger stations can be daisy-chained together, up to a maximum of 6 units.

**PERSONAL**

Weighing approximately 750g (26oz) the Mi-TIC 320 is a small format thermal imager that can be easily and comfortably held in the palm of your hand. Unlike many thermal imagers, the Mi-TIC 320 design allows it to be worn in multiple ways – in the hand, inside a pocket, clipped outside a pocket, clipped to a lanyard or hung around the neck.

| MI-TIC-320-3 | $5,699.00 |

SCENEdot is a patented material that easily creates a reflective area on most any surface of a fire apparatus. There is the original reflective material or the new 3M diamond grade with sealed edges to fill your apparatus needs. Each one comes in a slick sheet format for easier installation. It takes 2 1/2 sheets to cover 1 square foot.

Diamond Grade SCENEdot sheet $22.00

Ask Great Plains Fire today about installation and pricing for your apparatus.

www.GreatPlainsFire.com
The R.O.S. Platform is a new, innovative idea that makes firefighting roof operations safer than it has ever been. This tool was developed by firefighters for firefighters.

Whether you are performing vertical ventilation, dormer window rescue, chimney fire operations or any other work that requires the use of a roof ladder; this platform provides a safe and solid place for your foot when you need to leave the safety of the ladder.

This is not just a step, it is a working platform. It will provide the necessary support to every member of your department, from the largest to the smallest.

It gives those apprehensive crews the confidence they need to perform roof work without the fear of a slip and fall.

No more placing your life and career on the head of a buried pick axe or halligan tool. No more tripping hazard caused by the handle of a rubbish hook. No more relying on the roof beneath you to support your weight.

SAFETY

OSHA compliant under section 1910.27
Made with light weight non-skid Aluminum diamond plate.
Easily deploys to either side of the ladder.

STOW-ABILITY

Stow-able on any NFPA standard roof ladder.
Easy to stow on both Aerials and Engines.

ACCESSIBILITY

Makes for versatile, safe and secure platform for a variety of roof operations such as vertical ventilations and chimney fires.
Deploys to the roof on the ladder. No additional equipment to carry.
If it’s already up there, why not use it?

$475.00
Standard Folding Tanks
500-5000 Gallons
All frame tanks are 29” tall
Includes “Easy Lift” handles
22oz vinyl wall with 28oz vinyl base.
Custom Sizes Available

Skinny™ Tank
Folding frame tank with narrow design. It gives you more options for where you can set up your drop tank.

Easy Lift Handles
Easy lift handles come standard on all Husky drop tanks, making tear-down quick and easy!

Add $150.00 for this option

Replacement Liners & Frames
Contact Great Plains Fire for pricing

Portable Drop Tank Racks built to any size drop tank. Includes front and rear wind dam, lever lock hold downs, heavy duty hinges, and aluminum/stainless steel construction.

1500-2500 gallon drop tank racks $1,684.00
3000-5000 gallon drop tank racks $2,035.00

Pro500 Tank Liner The Ultimate Replacement liner for your existing folding Frame Tank

- Fits in your standard tank rack and any standard frame including our Skinny Tank, which works great on one-lane backroads!
- No need to remove frame uprights with Pro500 liner
- Minimal setup—Unfold, unhook, & Go
- Bladders can be deployed and folded by just one person
- On a Slope? No Problem! Bladders will not cause Pro500 to roll over!
- Need more gallons? Deploy as many bladders as needed or use as a regular tank
- The Pro500 bladders can be custom sized. Bladders can be added and made of different sizes.

**PyroBlitz Ultra High Pressure (UHP) Fire Suppression Systems**

**20gpm skids for Wildland, Fast Attack or First Response Vehicles**

**MORE EFFECTIVE.** Ultra High Pressure (UHP) breaks down a standard water pressure droplet to 64 micro droplets using a pressure of up to 1400psi. This creates 12 times the surface area to capture more heat energy. Resulting in 90% of the water used efficiently to put out the fire. Conventional droplets are too large to be effective, only the very outside layer is effective, up to 85-90% of the water goes right through the fire and ends up as runoff. Takeout far more fire with far less water!

**SAFER.** Smaller, lighter droplets have better ‘hang-time’. Droplets will suspend longer in the upper thermal layers, reducing heat in the most dangerous part of the fire. These droplets are light enough to be drawn into the flowpath of the fire sending suppression to where it is needed most. These micro droplets will get into every nook and cranny of a vehicle or house helping to extinguish fires that aren’t immediately visible.

**FASTER.** More efficient use of the water allows a fire department to be effective with far less water enabling them to reduce the size of the vehicle needed. A smaller vehicle is far more mobile and can get to the fire much quicker. These vehicles can also get closer to the fire itself. The PyroBlitz system has 200' of charged line, further reducing the deployment time needed at the fire scene. With fires burning 8 times faster these days it is even more critical to get on the scene and flowing water faster.

4 Hole Ratcheting Fire Hydrant with Standard Handle

Features:
- 3 Custom designed hooks
- Choose from 9 different socket sizes
- Compatible with EZ Spanner Breaker Bar
- Weight: 5 lbs.
- Length: 19”
- Thickness: 3/4”

#4400  $265.00

EZ-Spanner Adjustable Fire Hydrant Wrench

Features:
- Quick slide Mechanism
- 3 Custom designed hooks
- Compatible with EZ-Spanner Breaker Bar
- Weight: 3.25 lbs.
- Length: 16”
- Thickness: 3/4”

#6001  $179.00

EZ-Spanner Breaker Bar

The slide on extension bar is a very useful accessory that is compatible with all EZ-Spanner Standard Handle tools. Made from high strength, solid aluminum, this tool gives you an immediate option for adding leverage to those very hard to open fire hydrants.

#BB-100  $49.00

Billy Goat Compact Ratcheting Fire Hydrant Wrench

- Body: High Strength Aluminum
- Gears and moving parts: 100% stainless steel
- Length: 16”
- Width: 4” at its widest point
- Thickness: 3/4” thick
- Weight: 3.0 lbs

#3001  $169.00

Mini-Goat Pocket Tool

It incorporates the EZ-Spanner custom hook design, into a small, slim hand tool. The two convenient gas shut offs give you options for getting the tool into tight spaces making it easier to turn the valve. This wrench is also great in the field where it can be used to tighten hose couplings and for a variety of other uses. It’s a strong aluminum, very lightweight and durable tool.

Available in silver, black, red & blue

#MG-100  $29.95

SuperVac Direct Drive Valor Fans

18" : the most popular size PPV – perfect combination of size and power
20" : capable of handling larger jobs – great for departments with larger residential structures

Valor Series: The latest frame from Super Vac featuring a patent pending aluminum frame design that is simple and intuitive. Features a true full roll cage, 15% lighter than previous designs, 5 position tilt via a quick step pad, ability to easily attach duct makes the Valor one of the most versatile fans on the market – available in 18” & 20” – StreamShaper Guard comes Standard

18” 160 cc #v18-GC $2,584.00
20” 160 cc #V-20GC $2,711.50
18” Electric #V18-EV $3145.00
20” Electric #V20-EV $3,258.50

Super Vac 16” Variable Speed Battery Fan

1. Compact, Roll-Cage Frame: Features a tough yet lightweight aluminum frame to protect key components while providing a compact, lightweight design
2. 180-Degree Tilt: Provides the largest tilt range among battery fans, allowing airflow to be directed virtually anywhere
3. DeWalt FLEXVOLT Lithium Ion Batteries: Provide up to 45 minutes of max airflow, depending on battery selection
4. Polymer Blade: Minimizes weight; Super Vac’s single-piece cast aluminum blade is available by request
5. Precision-Spun Steel Shroud with StreamShaper Guard: Shroud provides durability with max airflow, while the StreamShaper guard allows for flexible setback; Air Cone Guard available by request

V18-BD-09-AC $4478.65
V18-BD-09-AC-SP $4841.60

ALL FAN PRICES INCLUDE FREIGHT

Please call Great Plains Fire if you do not see the SuperVac fan for your department needs.

Visit www.teamequipment.com for more saw kits and equipment.
**BAT fan NEO: PORTABLE BATTERY-POWERED LEADER FAN**

**Powerful and low weight for self contained operations**

2 versions to choose from:
- BATfan 20: 20-min runtime/54.4 lbs $4135.00
- BATfan 45: 45 min runtime/61.7 lbs $4493.00

Totally self-contained featuring the NEO technology
- Compact, lightweight, foldable; Small footprint, 2 BATfans occupy the space of one conventional fan
- LED “Traffic light” battery indicator
- Adjustable tilt from –10º to +30º

Powerful airflow: 14,155 CFM

---

**LEADER Fan: MT 240 & MT 236 NEO: Gasoline Driven**

Outstanding R&D and design have greatly increased air movement efficiency with NEO technology.

The MT240 produces **over 33,050 CFM** of air flow with an 18” blade (over 21,355 CFM tested in accordance with AMCA 240).

Other Changes in design result in **greatly improved stability and ease of use**.

The same revolutionary concepts are used in the MT236 NEO which now returns over 30,400 CFM

INNOTEX GRAY HOOD

- Shields vulnerable area between helmet & coat while maintaining air permeability.

- A 3 layer system: The exterior layer is a 20%/80% Nomex/Lenzing blend. The middle layer, a proprietary version of Stedair® PREVENT, blocks more than 99% of particulates ranging from 0.1 to 1.0 microns. The inner liner is a smooth, cooling multi-filament viscose.

- Allows for air permeation, which is essential to reduce the risk of increased core temperature.

- Uses a particulate blocking layer that reduces the risk of contamination by particulates 0.1 to 1.0 microns (µm) found in the combustion of structural fires by >99%.

#Gray25-ML $97.00
#Gray25-XL $97.00
Welcome to the newest technology in turn-out gear

Coat features
Ergo design for greater mobility
Variable height collar, transition from 4” back to 3” front

Dual Certified Gear from Lakeland Fire is designed for all of those situations where full turnout gear isn’t needed. Whether its Wild Fires, Search and Rescue, Vehicle Extrication, Overhauling or whatever task the day’s shift might throw at you, Lakeland’s new Dual Certified Gear offers the protection and performance these tasks require. Available in coat and pant, or coveralls, all made with Tencate Defender M Gold shell fabric, these styles are all ergonomically designed and full of features to provide outstanding function and comfort. To keep you seen and safe, Lakeland is incorporating 3M® Segmented Reflective Triple Trim, along with our Exclusive LazerMax Reflective Piping, to provide you with the utmost in visibility, day or night. The design and features of Lakeland’s new Dual Certified Gear will keep you focused on the job at hand, not worried about the fit and performance of your gear, all while saving your turnout gear for when its truly needed.

Fire “TKO  FST Fire Suppression Tool

- Coverage up to 5,300 Cubic Feet
- Emits No Flame!
- No Pyrotechnic Igniter!
- Water Resistant Shell
- Electric Start!
- Rugged Steel Body Construction
- Operates to –67°F
- Fully Warrantied
- Deploys after 8 Second Delay
- The Safest Aerosol Fire Fighting Tool Available Today!

Features:
- Offers extraordinary knock down as well as fast suppression capabilities
- Reduces temperatures by as much as 1,000°F in 30 seconds
- Can cut water usage by as much as 80%, when used properly
- Is SNAP listed by US EPA
- Is environmentally friendly
- Does not reduce or depletes oxygen
- Can eliminate flashover and backdraft
- Is Non-Toxic, Non-Corrosive, Non-Conductive
- Highly efficient and suitable against A-B-C-K class fires
- Is not pressurized
- Has a 5 year battery life
- Has a 15 year shelf life
- Include a new “R-pin” that protects igniter pin from being accidentally removed
- LED light turns red when the unit is activated!
